**IMMEDIATE RELEASE**

**February 26, 1994**

### **FY 1994 RESERVE COMPONENT UNIT INACTIVATIONS**

Secretary of Defense William Perry today announced Reserve component manpower reductions and units to be inactivated by the Army, Navy, Marine Corps and Air Force in Fiscal Year 1994. This will result in a reduction of 55,100 billets this fiscal year. The actions are consistent with the Guard and Reserve personnel year end strength reductions reflected in the congressional actions for FY 1994.

The Bottom-Up Review concluded that a heavier reliance on Reserve component capabilities in the future was warranted in order to carry out the military strategy and to provide emergency domestic response. Although the Reserves will be reduced in the future, they will not be reduced at the rate of active duty forces, and will be sized and shaped to ensure success of the DoD strategy to win two nearly simultaneous major regional contingencies. "We are doing this through the application of compensating leverage, which uses the Reserve components to control peacetime costs and to reduce the risks associated with smaller active forces," Dr. Perry said.

The Fiscal Year 1994 reductions are the first of DoD's five-year plan to reduce and reshape Reserve forces to meet end strength levels established through the Bottom-Up Review. Additional reductions are expected to be announced each year until the full plan is achieved. No unit-specific final decisions have been reached beyond those announced as part of this package.

As the Department continues to manage the restructuring and drawdown, emphasis will be placed on the following key areas:

- **Enhance Force Readiness.** The increased reliance that the Bottom-Up Review placed on the Reserve components requires the focus on improving the readiness of remaining Reserve forces.
- **Domestic Responsibilities.** The ability to respond when needed to domestic emergencies is an important element to national security. The states have the primary responsibility to respond to domestic emergencies. Accordingly, the drawdown has been implemented in a way to minimize the impact on the states' ability to respond to these needs.

**-MORE-**

-- **Protect People.** The transition benefits authorized by Congress will be used to reduce the impact on Reservists leaving the force during the drawdown.

Dr. Perry said, "People and readiness are our top concerns. We are committed to an orderly transition that will take care of those who have served so long and so well while also enhancing the readiness of our remaining forces--for both the operational wartime and the peacetime domestic emergency assistance mission."

The Bottom-Up Review provided the Department and the Military Services the strategy and force structure adjustments required to meet a post-Cold War threat. The following criteria were used to define Reserve component force changes in this context and will be used for future unit inactivations:

--**Reductions in Mobilization Requirements:** Fewer Reserve forces are required to respond to regional contingencies than for "Cold War" global threats.

--**Doctrinal Changes:** Force requirements are different because the military Service has changed one or more ways in which it plans and conducts operations. Units not meeting these requirements were either restructured or eliminated.

--**Readiness:** Once force types were identified for reduction, priority for retention was given to those units achieving the highest level of recruiting, retention and/or other factors contributing to readiness.

--**Domestic Emergency Response:** Consideration was given to retain units and personnel meeting the above criteria that also have the ability to support critical domestic emergency response missions.

Dr. Perry emphasized that the size of the Reserve reduction and percentage change in each state are somewhat different. However, all states will maintain forces adequate to respond to domestic emergencies. "It is impossible to direct an equal percentage reduction across the states if we are to maintain our commitment to readiness," he said. "An equal percentage cut would mean that many units would be left hollow and unable to accomplish their wartime mission."

## **Q&A on FY94 Reserve Component Inactivations**

**Q: How do the FY94 inactivations relate to the Bottom-Up Review?**

**A:** The FY 94 reductions set the stage for a five year plan to reduce and reshape Reserve forces to meet end strength levels established through the Bottom-Up Review. The Bottom-Up Review provided the Department of Defense and the Military Services with the strategy and force structure adjustments required to meet a post-Cold War threat. In this context, the following criteria were used to define Reserve component force changes:

- **Reductions in Mobilization Requirements** -- fewer forces are required to respond to regional rather than "Cold War" global threats.
- **Doctrinal Changes** -- force requirement is different due to changes in the ways the Service plans and conducts operations.
- **Readiness** -- once the type of unit was identified for reduction, priority for retention was given to units achieving highest level of readiness, as measured by recruiting, retention and/or other factors contributing to readiness.
- **Domestic emergency response** -- consideration was given to retain units and personnel which support both the National Military Strategy and critical domestic emergency response missions.

**Q: What is DOD's priority in managing this restructuring and drawdown of the Reserve component?**

**A:** The Department has three priorities in this restructuring:

- **To enhance force readiness** -- with an increased reliance on the Reserve components flowing from the Bottom-Up Review, the readiness of the remaining forces must be improved;
- **To protect people** -- whenever possible, soldiers will be transferred to other units; however, transition benefits authorized by the Congress will take care of Reservists leaving the force; and
- **To preserve domestic response capability** -- the drawdown is being managed to minimize the impact on the states' ability to respond to domestic emergencies.

**Q: Who identified specific units for inactivation?**

**A:** The decision was made by the individual Services.

**Q: What was the impact on these inactivations of the off-site agreement on restructuring the Army Reserve components?**

**A:** The only unit placed on the FY94 inactivation list because of the offsite agreement was the 12th Special Forces Group (Airborne).

**Q: What happens to the people who belong to units scheduled for inactivation?**

**A:** The Reserve Chiefs are committed to accommodating people whose units are being inactivated. Wherever possible, personnel from inactivating units will be reassigned to other reserve component units within a reasonable distance from their residence. If there is no valid position available, the individual will be separated with the appropriate transition benefits. If an individual declines the new assignment, he or she will be involuntarily separated from the Selected Reserve without transition benefits.

**Q: What is the number of people who will be affected?**

**A:** Reserve component force structure positions will be reduced by 51,300 in FY94. This is not the same number of personnel that will be affected. Reserve component personnel will be given the opportunity to join another unit within a reasonable distance of where they live. Since it is difficult to determine how many individuals will accept a transfer to another unit, the number that will be involuntarily separated is difficult to determine. Also, unit relocations resulting from base closures and related activities will result in a certain amount of turbulence during this period.

**Q: What kind of transition programs are planned or in place? What benefits or entitlements would a Reservist receive when a unit is inactivated?**

**A:** The National Defense Authorization Act for FY93 authorizes transition benefits for certain members of the Selected Reserve who are involuntarily separated from their unit or are transferred from the Selected Reserve due to the inactivation or reorganization of their unit. The benefits include: separation pay, special separation pay, early retirement at age 60, continuation of education benefits under the Montgomery GI bill, limited Commissary and Post Exchange privileges and priority placement benefits for those who are involuntarily separated due to inactivation or reorganization of units.

**Q: What impact does the inactivation have on an individual's financial commitment for education or commitment to serve a certain number of years?**

**A:** The National Defense Authorization Act of FY93 provided that individuals who are enrolled in the Montgomery GI Bill program at the time of their separation and who experience an involuntary separation due to unit inactivations or reorganizations, will continue to receive the benefits. If an individual is required to serve a certain number of years in exchange for education benefits, that provision, generally, is waived when the individual is involuntarily separated. If a member of the Selected Reserve has enlisted or re-enlisted for a bonus, or the Student Loan Repayment Program, and then has his or her unit inactivated, the individual is no longer entitled to receive payments.

**Q: How will Reservists know if they are affected by the inactivation?**

**A:** The affected personnel will be notified through normal military channels.

**Q: Can these Reserve units be reconstituted and activated again if there is a major conflict?**

**A:** No, but remaining forces provide adequate strategic insurance for the reconstituted mission.

**Q: How do these inactivations affect readiness?**

**A:** Since the units on the list will no longer receive manpower and equipment, the Services will be able to focus their available resources on higher priority units. This will improve the readiness of the remaining units at a quicker pace than if they had to compete for these resources in a larger arena. Some of the units scheduled for inactivation already were determined to be in a lower state of readiness; as a result, it would require a greater expenditure to improve their readiness than the units that will remain.

**Q: What will happen to the weapons and equipment "owned" by these units?**

**A:** The weapons and equipment of units that inactivate will be redistributed to priority units that need the equipment. Weapons and equipment that are excess to these requirements will be returned to the Services' supply systems for appropriate disposition.

**Q: What will happen to the facilities used by these units?**

**A:** Many National Guard armories are the property of the states and they will be returned to the state for use if they are no longer needed. If the facility is leased space, the leases would be terminated if there are no other units in need of the facility. In some cases, other units will use the same facilities. With respect to property owned by DOD, if no DOD agency has a need for the property, it will be transferred to the GSA for disposition.

**Q: Did any of these units participate in Operation Desert Shield/Desert Storm?**

**A:** The Services can provide the specific lists of units that participated.

FY 94 Inactivation Announcement  
Proposed Timeline

11 Feb	Package back from the Services (All corrections of numbers, suggested re-wording of stories, letters from each of the Service Secretaries, names of POC's for "hotlines", identification of anticipated problems with MC's, governors, etc.)
15 Feb	Revised package sent back to Services for final blessing
16 Feb	Package sent to OSD/PA for security review
17 Feb 1400	Meeting with OSD/PA , OSD/LA and Comptroller/LA and LA and PA reps of the Services to coordinate the plan (Identify who takes responsibility for specific components, identify who should take part in the various briefings and telephone calls, number of copies of the package to be printed, distribution of the package by Whom?, etc.)
18 Feb	Finalize identity of Members of Congress and staff to be called or visited before the drop of the package on the 28th.  The package should be cleared by OSD/PA security review.
21 Feb	Package sent to OSD/Printing services
24 Feb	Package back from printer  Ms. DeLaski/Stuart briefed on the final package
24-25 Feb	Designated briefers visit or call Congressional offices with greatest impact  Invitations extended to key Congressional staffers for briefing on the 28th
25 Feb 1500	Dry run of the Congressional staff brief in the DSC with the key "players"
25 Feb COB	Get copies of the package to the distributor for preparation of distribution to the Hill (embargoed)  Prepare Federal Express mailing of copies to adjutants general, associations, ARCOM, GOCOM, REDCOM, etc. (for arrival on the afternoon of the 28th)

# **FY 94 RESERVE COMPONENT REDUCTION PLAN**

## FISCAL YEAR 1994 RESERVE COMPONENT REDUCTIONS PLAN

### Sizing the Force for New World Realities

#### The Bottom-Up Review

During the period of the Cold War, the Reserve components of the armed forces were structured to supply the massive combat sustainability and support functions of a general world war. At its peak in FY 1989, the Reserve components were structured at close to 1.2 million personnel.

The Bottom-Up Review identified new threats. These new dangers require Reserve components which, while smaller in size, must be more modern, ready to mobilize and deploy in a shorter time period, and be fully integrated into not only the wartime requirements but also the peacetime operations of the active forces. Additionally the National Guard must continue to be sized and structured to meet both its federal and state missions.

These challenges will be met because the Bottom-Up Review provides the basis for an integrated Active/Reserve restructuring plan. The Reserve components will achieve a force structure of approximately 950,000 by FY 1999. In addition, some missions will change.

Broadly speaking, the Army National Guard will focus on preparing for its wartime combat role, while the Army Reserve will retain combat support functions and assume core responsibility for combat service support. The Air National Guard and Air Force Reserve will assume all continental air defense while increasing their role in strategic mobility. Additionally they will stand up a bomber mission for the first time.

The Naval Reserve, while smaller, will enhance its strengths in providing support to virtually all naval missions. The Marine Corps Reserve, already well structured for the types of threats foreseen in the future, will continue its mission of sustaining the Corps. In addition, the Bottom-Up Review directed the reinstatement of reinforcing forces -- a capability which would have been lost under the old Base Force plan.

#### FY 1994 Reserve Reductions

Force structure actions will move the Department of Defense significantly forward in achieving its future structure goals. The reduction in force structure (wartime required positions) of 48,900, and appropriated end strength (funded positions) of 55,100 is a significant drop. In the outyears, reductions will continue, but at a lower annual rate, to meet the FY 1999 target. Future reductions will focus on refining the Reserve force as it transitions into new missions and patterns of readiness. Because force structure is based on wartime required positions, and appropriated end strength on current funding, the two figures will not necessarily be equal.

**FY 94 State-by-State Net Force Structure Changes, By Component**

The following is a consolidated list of force structure impacts by state and individual Reserve component showing the net change from all force structure actions. These actions include the unit inactivations which are displayed in Tabs A-D and adjustments which account for change in equipment, transitions in mission, doctrinal adjustments, transfers to other localities, and Congressionally directed actions.

### **Continued Support for Domestic Emergency Assistance**

The need to respond to domestic emergencies, such as natural disasters and man-made emergencies, is an important component of the current national military strategy. Throughout this nation's history, dedicated members of the Army and Air National Guard, the other Reserve components and Active forces, have proven their value in responding to natural disasters and man-made emergencies. In the past several years alone, thousands of men and women of the Guard and Reserve have assisted their fellow-citizens in need -- from the victims of Hurricanes Hugo, Andrew and Iniki to victims of the floods in the Midwest and, most recently, victims of the California earthquakes. By its very nature, a disaster is unpredictable in both frequency of occurrence and location; as a result, sufficient force structure must be retained throughout the country to allow the states to respond to these unforeseeable domestic emergencies.

In the Bottom-Up Review, this essential domestic response capability was a significant factor during the force structure deliberations on the size of the National Guard. As the National Guard is restructured to meet the threats of two major regional contingencies, careful consideration has been given to the states' requirements for domestic support, particularly in the areas of utility helicopter aviation, engineering and medical capabilities. A review of the last several decades of actual National Guard responses to domestic emergencies, will show that, consistently, there has been sufficient capability in the states to manage the state missions; the numbers generated by the Bottom-Up Review, similarly, will provide the states with the capability to respond to domestic emergencies as they occur. The current plan of 37 Army National Guard brigades and FY1999 end strength of 367,000 will satisfy both the national contingency requirements as well as state missions.

### **Selected Reserve Transition Programs:**

The transition initiatives approved by Secretary of Defense and implemented by the Department include:

- **Special Separation Pay:** A member of the Selected Reserve who has 20 or more years of service, who has qualified for retirement upon reaching age 60, but who is not yet 60 and who is involuntarily separated will qualify for special separation pay upon transfer to the Retired Reserve.
- **Early Qualification for Retired Pay:** A member of the Selected Reserve who has completed more than 15 qualifying years of service but less than 20 and who is involuntarily separated, will be eligible for retired pay at age 60. Service Secretaries are authorized to extend the program to members in designated grades, length of service and skill categories who voluntarily transfer to the Retired Reserve.
- **Separation Pay:** A member of the Selected Reserve who is involuntarily discharged or transferred from the Selected Reserve and who has between 6 and 15 years of service will be eligible for separation pay.

DRAFT

654

SECRETARY OF THE ARMY  
WASHINGTON

Member of the 103rd Congress  
Washington, D.C.

Dear Member of the 103rd Congress:

Attached are the Army's Fiscal Year (FY) 1994 force structure reductions for both the Army National Guard (ARNG) and the United States Army Reserve (USAR). These unit inactivations continue the reshaping/downsizing of America's Army which has been underway since the end of the Cold War and the refocusing of the National Military Strategy. Readiness continues to be the primary factor in the unit selection process. Criteria used in determining the specific FY 1994 inactivations were ability to meet future readiness requirements (readiness, deployability, recruiting, retention, facilities support, training), fairness (geographic impact, personnel impact), and consideration of unique measures (military support to civil authorities).

The FY 1994 inactivation plan is but one part of the reshaping plan for America's Army and should be considered in this context. The realignment and restructuring of the Army's reserve components announced by the Secretary of Defense early last December is reflected by the incorporation of Special Forces (SF) structure from the USAR in this year's plan. As America's Army continues to evolve along with the changing National Military Strategy, reductions required to reach the Army's programmed endstate will be announced on a year to year basis to preclude creating undue soldier hardships and unit unreadiness.

While enhancing our readiness through these reshaping efforts, we remain committed to taking care of the affected soldiers and their families. Whenever practicable, soldiers from inactivating units will be given an opportunity for reassignment within a reasonable distance of their residence. Where this is not possible, transition benefits will be provided to those qualified.

I want to emphasize that this plan is part of the overall efforts to reshape and downsize all components of America's Army to meet both the National Military Strategy and fiscal constraints. With your support we will continue toward our goal to produce the most capable force at the least cost, while minimizing the impact on the soldiers, their families and their communities.

Sincerely,

Togo D. West, Jr.

Attachments

## THE RESERVE COMPONENTS OF THE ARMY

### Army Guard and Reserve Roles Significantly Expanded

#### The Bottom-Up Review

During the Cold War, the Army Reserve Components(RC) focused on division-size combat forces and large groupings of combat support and service support units to reinforce Europe. At its height in Fiscal Year 1989, this force represented approximately 770,000 RC personnel.

With the new dangers addressed in the Bottom-Up Review, the Army Guard and Army Reserve will be sustained at 575,000 people to support our new strategy. We will reach 575,000 through a gradual drawdown in the force through FY 99.

- The Army Guard's principal mission will be wartime combat and providing peacetime domestic emergency assistance. The Guard's wartime combat capability will focus on brigade-size units: about 37 Guard combat brigades in FY 1999. Fifteen will be enhanced readiness combat brigades which will be resourced to be ready to begin deployment 90 days after call-up. This new National Guard structure was designed to support the win-win strategy of two concurrent, nearly simultaneous major regional contingencies envisioned in the Bottom-Up Review.
- The Army Reserve will provide wartime combat support and combat service support. The units in the Army Reserve will be resourced to be able to deploy rapidly and be integrated effectively into the active force. In transitioning to the new structure some support roles currently in the Guard will receive added emphasis in the Army Reserve, to include medical, signal, and transportation capabilities.

#### The Numbers

\*Force Structure numbers reflect the total number of required positions to support established units in the force.

# End Strength numbers reflect the number of positions authorized and funded by Congress.

#### Force Structure\*

	<u>FY 93</u>	<u>FY 94</u>	<u>Δ FY</u> <u>93-94</u>	<u>FY 99</u> <u>Planned</u>	<u>Δ FY</u> <u>94-99</u>
<u>Army Guard</u>	425,300	419,800	-5,500	405,000	-14,800
<u>Army Reserve</u>	266,400@	237,500@	-29,000	208,000	-29,500
@Excludes Individual Mobilization Augmentees					

#### End Strength#

	<u>FY 93</u> <u>(Authorized &amp; Appropriated)</u>	<u>FY 94</u> <u>(Authorized &amp; Appropriated)</u>	<u>Δ FY</u> <u>93-94</u>	<u>FY 99</u> <u>Projected</u>	<u>Δ FY</u> <u>94-99</u>
<u>Army Guard</u>	422,700	410,000	-12,700	367,000	-43,000
<u>Army Reserve</u>	279,600	260,000	-19,600	208,000	-52,000

We will reduce the size of the Guard and Reserve gradually to protect our people and our readiness. The Congressional extension of transition benefits through Fiscal Year 1999 will allow us to take care of those who have served us well and who will leave us during the draw-down.

**Unprecedented Reserve Component Input**

The Fiscal Year 1994 personnel levels discussed here were agreed to during the February 1993 RC Leaders "Handshake" Agreement with the Chief of Staff of the Army. The Fiscal Year 1999 levels were subsequently agreed to in the historic plan announced by Secretary Aspin on December 10, 1993. This agreement will provide long term stability of the force following some near term turbulence.

Only one unit on the Fiscal Year 1994 inactivation list directly relates to the restructuring part of the December 10th agreement. All others relate to the overall downsizing that would have happened anyway under the President's Budget and Congressional action.

**Unit List:** The listing of Army Guard and Reserve units inactivating in 1994 are next under.

Force structure reductions in the Army Reserve are higher than end strength reductions because some of the end strength now associated with inactivating units is being placed into other Army Reserve units which will be retained in the future. On the other hand, end strength reductions for the Army National Guard are greater than the force structure reductions. This action is being taken to bring force structure and end strength into closer alignment with Bottom Up Review objectives, which permits lower manning levels in later deploying units.

THE SECRETARY OF THE NAVY  
WASHINGTON, D. C. 20350-1000

As we "right-size" the Department of the Navy, it is vitally important that we shape our Total Force in a way which preserves readiness and develops a Naval Service that, although smaller, is more able to carry out our "...From the Sea" vision. Although we are announcing reductions which will reduce the present size of the Navy and Marine Corps Reserve, our Reserve Components are an integral part of the Department of the Navy, and they will remain so. In fact, as our "right-sizing" plans come to fruition, the relative size of the reserve components as a percentage of the overall Total Force will actually increase.

In shaping a more relevant Reserve Component, particular attention must be paid to preserving the unique contributions our citizen sailors and Marines make to our national defense. I am committed to sustaining our connection to the citizens of our great country through a vibrant and cost effective Naval Reserve and Marine Corps Reserve.

## THE NAVAL RESERVE

### The Bottom-Up Review

At the height of the Cold War, the Naval Reserve was sized and shaped (force structure of 152,600) to provide immediate augmentation (people) to active units and complete Reserve Force units (ships, squadrons, and other units) to expand the fleet in response to the threat of a global war. In the post Cold War world, we need far fewer augmentation forces. At the same time, our need for an Active and Reserve team of naval expeditionary forces shaped for joint littoral operations (near the coast line) and diverse regional crises remains strong.

The major determinant for sizing Reserve force structure is an ability to respond to two nearly simultaneous major regional contingencies and provide contributory support as part of peacetime operations. With this thrust, the overall size of the Naval Reserve -- particularly the augmentation forces -- will be reduced, while some mission areas, within the equipped forces, will be increased.

More specifically, ships are being moved into the Naval Reserve where there is a low requirement for peacetime operations, but where they may be needed for contingency operations. The Naval Reserve is planned to have more modern ships than ever, including 10 Perry-class frigates and new Mine-Countermeasures Ships.

Naval Reserve Aviation maintains sufficient peacetime readiness to augment active forces during contingency operations. Nine maritime patrol squadrons of P-3 aircraft will be retained along with one (of the current two) Reserve carrier air wings. Additionally the Naval Reserve will increase its role as the primary operator of naval logistics aircraft for the Total Force.

### The Numbers

\*Force Structure numbers reflect the total number of required positions to support established units in the force.

# End Strength numbers reflect the number of positions authorized and funded by Congress.

#### Force Structure\*

	<u>FY 93</u>	<u>FY 94</u>	<u>Δ FY</u> <u>93-94</u>	<u>FY 99</u> <u>Planned</u>	<u>Δ FY</u> <u>94-99</u>
<u>Naval Reserve</u>	150,500	139,700	-10,800	-98,000	--41,700

#### End Strength#

	<u>FY 93</u> <u>(Authorized &amp;</u> <u>Appropriated)</u>	<u>FY 94</u> <u>(Authorized &amp;</u> <u>Appropriated)</u>	<u>Δ FY</u> <u>93-94</u>	<u>FY 99</u> <u>Projected</u>	<u>Δ FY</u> <u>94-99</u>
<u>Naval Reserve</u>	133,700	113,400@	-20,300	-98,000	--15,400

@118,000 was authorized, but funding was not appropriated to support end strengths above 113,400

Approximately half of the decline for Fiscal Year 1994 is the direct result of reduced mobilization requirements. The remaining decline represents personnel reductions in preparation for future year adjustments based on the Bottom-Up Review. All are related to levels prescribed in the President's Budget and Congressional actions for this Fiscal Year.

Of primary concern as we reduce the size of the Naval Reserve is protecting our people and our readiness. The Congressional extension of transition benefits through Fiscal Year 1999 will allow us to take care of those who have served us well and will leave during the draw-down.

**Unit List:** A listing of all Naval Reserve units inactivating in 1994, totaling 10,789 positions nationally, is provided next. Note that an additional 9,486 positions will be vacated through attrition to reach authorized end strength levels.

## THE MARINE CORPS RESERVE

### The Bottom-Up Review

The Marine Corps of the Cold War era -- both Active and Reserve -- contained the same characteristics needed to meet regional contingencies we might face in the post Cold War era. Accordingly, there will be little change required in the Marine Corps Reserve. Specifically, the Bottom-Up Review reaffirmed a requirement for both an augmentation and reinforcement capability in the Marine Corps Reserve and directed maintenance of a selected Marine Corps Reserve strength of 42,000.

The Marine Corps Reserve of the future will still be a relatively small force - about 20 percent of the total Marine Corps authorized personnel strength. The integration of Marine Reserve combat units will continue to be at the small unit level.

### The Numbers

\*Force Structure numbers reflect the total number of required positions to support established units in the force.  
# End Strength numbers reflect the number of positions authorized and funded by Congress.

SECRETARY OF THE AIR FORCE  
WASHINGTON

**DRAFT**

MEMORANDUM FOR ASSISTANT SECRETARY OF DEFENSE  
(RESERVE AFFAIRS)

**SUBJECT: FY 94 Reserve Component Reduction Plan**

The Defense Bottom-Up Review has resulted in Reserve personnel end-strength reductions over the five year budget cycle. While the Bottom-Up Review eliminated some Cold War driven force requirements, the new geopolitical reality calls for retaining most of the existing Air Reserve Component capability. Furthermore, the draw down of the active Air Force is opening new mission areas such as heavy bombers to the Air Reserve Component.

While most of our Reserve members will have the opportunity to serve until reaching normal retirement eligibility, some will have to involuntarily leave the Reserve Components earlier. In such cases we have several programs at our disposal by which we can ease the transition of these members. We echo Dr Perry's concern for taking care of those who have served so well, and we will diligently pursue transition assistance and priority placement programs for our affected members.

The Total Force Policy has served the Air Force well for over twenty years, and it is evolving to meet current requirements. This program of adjustments to our Reserve end strength and force structure preserves the Total Force and provides for our most important assets, Air Force people.

## RESERVE COMPONENTS OF THE AIR FORCE

### Bottom-Up Review

The Air National Guard and Air Force Reserve have achieved substantial readiness in missions which continue to be appropriate to regional contingencies. The Bottom-Up Review affirmed the need to retain into FY 1999 about the current level for the Air Reserve Components.

The Bottom-Up Review directed the Reserve components of the Air Force to take on the following new missions and expanded existing missions.

- The Air Guard and Reserve will move into the conventional bomber function, as well as have expanded contributions to the Air Force tanker and strategic lift functions.
- The Air Guard will take command and control of Continental Air Defense, including the 1st Air Force and all Regional and Sector Operations Centers.

At the height of the Cold War, personnel levels for the Air National Guard was 114,975 and for the Air Force Reserve was 83,615. As a result of the collapse of the Soviet-Warsaw Pact threat, the Bottom-Up Review directed reductions in the active and reserve fighter force. Air Guard interceptor squadrons will be reduced as a result of the end to the Soviet long range bomber threat. The Air Reserve Components fighter contribution will be reduced from 12 to 7 Fighter Wing Equivalents(FWE), concurrent with the Air Force's total reduction of FWEs from 38 to 20.

### The Numbers

\*Force Structure numbers reflect the total number of required positions to support established units in the force.

# End Strength numbers reflect the number of positions authorized and funded by Congress.

#### Force Structure\*

	<u>FY 93</u>	<u>FY 94</u>	<u>Δ FY</u> <u>93-94</u>	<u>FY 99</u> <u>Planned</u>	<u>Δ FY</u> <u>94-99</u>
Air National Guard	122,200	119,500	-2,700	116,000	-3500
Air Force Reserve	88,500	87,700	-800	87,100	-600

#### End Strength#

	<u>FY 93</u> <u>(Authorized &amp;</u> <u>Appropriated)</u>	<u>FY 94</u> <u>(Authorized &amp;</u> <u>Appropriated)</u>	<u>Δ FY</u> <u>93-94</u>	<u>FY 99</u> <u>Projected</u>	<u>Δ FY</u> <u>94-99</u>
Air National Guard	119,300	117,700	-1,600	116,000	-1,700
Air Force Reserve	82,300	81,500	-800	80,900	-600

Unit List: A listing of all units inactivating in the Air National Guard and Air Force Reserve in 1994 is provided next.
